

# GRADUATE CERTIFICATE IN PUBLIC HEALTH INFORMATICS

Public Health Informatics and Technology looks to reach and address the goals of equity in public health through training and career placement of minority students. These certificates are designed to increase the capacity of HBCU's to educate underrepresented students in data analytics and informatics.

## Public Health Informatics and Technology Certificate Programs

Our Data analytics, Public Health Informatics, and Business Analytics Certificates will provide professionals with the skills to compete for data analysis jobs in a global market. The certificate program will explore the complexities of data analytics and expose students to various data processing, analysis, and visualization topics.
