INDUSTRIAL TECHNOLOGY (B.S.) COMPUTER TECHNOLOGY CONCENTRATION

The computer technology option is designed to provide students with both theoretical knowledge and practical skills in computer and information technologies. Courses included in this option provide experiences in computer components, networking systems, networking installation, troubleshooting, and operating systems. Graduates of this option typically work as computer technicians, process/product analyst, application analysts, computer network specialists, programmers, or managers of computer operations.

Introduction/Mission

The mission of the Industrial Systems and Technology program is to provide a nationally accredited program, which serves the technical, managerial, and communication needs of persons desiring to enter or advance professionally in an industrial technology-related career.

The JSU Industrial Technology Programs will:

1. Prepare our graduates to meet employer expectations for competent professional, and ethical practice.
2. Prepare our graduates to pursue advanced studies in the areas of technology or other fields.
3. Prepare our graduates to adapt and continuously practice life-long learning and continuing education.

Objectives

The objectives of the Industrial Systems and Technology program are as follows:

- To produce competent technologists with specialized educational experiences that will enable them to become capable of ascertaining managerial, supervisory and production positions in areas such as business, industry, and government.
- To produce students with the capability to perform quality research in technology.
- To produce students with the ability to perform and take leadership roles in local, state, and national arenas.

Accreditation

The Industrial Systems and Technology program at Jackson State University is accredited by the Association of Technology, Management, and Applied Engineering (ATMAE).

Notes:

- Candidates that transfer 12 or more hours of college credit are exempt from UNIV 100 UNIVERSITY SUCCESS; however, the student must take 2 hours of general electives to replace the UNIV course.
- Online Graduation Clearance (**to be completed during the graduating semester only**).

Student Learning Outcomes

1. Demonstrate an understanding of the basic concepts of DC, AC, and analog circuits as well as an understanding of and use specialized instruments in a laboratory or workbench environment.
2. Understand the structure of a computing system, the design of its basic components and the interactions of hardware and software components
3. Demonstrate a basic knowledge of using, setting up, and maintaining personal computers and computer network systems
4. Demonstrate the skills needed to effectively manage a disaster scene.
